I came across the game Archlord, it's a free MMORPG Game (like World of Warcraft) and it makes actually fun :)

you can get the full version (it's 1,4GB!!) here <http://www.archlordgame.com/>.

As I'm from Germany the language is set to germany be default which sucks (lots of bugs etc)

You can change the game language in the registry:

go to:

HKEY\_LOCAL\_MACHINE\SOFTWARE\ArchLord

and change the setting "Language" (which was "German" in my case) to "English"

have fun with playing :->
